TITLE : AUTOMATIC VENDING MACHINE SYSTEM

ABSTRACT : PURPOSE: To provide an automatic vending machine system with which a portable telephone, car telephone or mobile telephone such as a personal handyphone system (PHS) can be utilized.

CONSTITUTION: The designation of an automatic vending machine 4 and commodity is inputted by a mobile telephone set 6 so that call originating source identification information (such as a telephone number, for example), the calling information of the designated automatic vending machine and commodity selection information can be transmitted from the mobile telephone set 6 through a communication line L to the automatic vending machine 4. At the automatic vending machine 4, the designated commodity is ejected from a commodity ejecting means to the outside based on the transmitted information, and the charging information of the ejected commodity and the call originating source identification information are transmitted to a charge collecting means. Based on the transmitted charging information and call originating source identification information, the charge collecting means collects the charge from the call originating source information (such as the owner of the mobile telephone) in a post-payment system.
